

Remarkably realistic - LECHUZA CUBETO and CANTO with a natural stone look

There is no better way to chase winter away than planting colorful and fragrant spring flowers. The new LECHUZA planters CUBETO and CANTO are perfect fresh style elements indoors and architectural highlights on the terrace or in the garden.

The new bowl planter CUBETO impresses with its innovative design: a classic outline combined with a natural looking surface and the well-tried LECHUZA sub-irrigation system. Following the example of nature, the 1.6 or 3 liter water reservoir provides plants with just the right amount of water and nutrients. When positioned on a terrace or in the garden, excessive rain water can drain easily thanks to the overflow system and removable drain plug. There are countless

options for creative planting: an inviting spring arrangement, a tasteful adornment for graves or a green Easter nest – the versatile CUBETO can be used for an abundance of occasions and can easily be moved around due to its light, high-quality polypropylene.

Clear lines with rough edges are key style features of the modern CANTO. In a cube or column shape, it is a versatile and up-to-date design element. It is particularly attractive indoors as a contrast to lush greens or opulent flower arrangements outside. The frame and hand grips of the removable plant liner match the color of the planter, while the liner can be placed in the cube as well as the column. This opens countless possibilities to decorate the modern home. With its 3 liter water reservoir, the LECHUZA sub-irrigation system ensures that plants

can prosper and flourish. The drain plug can be removed to allow excessive rain water to drain with ease and enables the use of the CANTO planter indoors as well as outdoors.

The new LECHUZA planters CUBETO and CANTO are right on trend with their cutting-edge design and natural upper. The planters effortlessly blend into modern architecture and current design. CANTO and CUBETO are the first planters with a stone-looking surface that offer the functional LECHUZA sub-irrigation system. The rough structure of these two novelties is a real highlight: the planters are made

from reliable and very light high-quality plastic and still look and feel like solid stone. The available colors sand beige, graphite black and stone gray are perfect matches for modern furniture and are attractive eye-catchers in the garden and on the terrace. When used outdoors, these smart planters protect plants from stagnant moisture. Thanks to the robust polypropylene, which is UV and frost resistant, and their up-to-date design, the LECHUZA planters offer many creative possibilities and are the ideal way of welcoming spring into any home.

The LECHUZA **CUBETO Color** is available in store from January 2017 in the colors sand beige, graphite black and stone gray. It comes in two different sizes as an All-in-One Set including planter, plant liner, sub-irrigation set and LECHUZA-PON plant substrate.
