

Green solutions for more well-being with the LECHUZA CUBE Premium

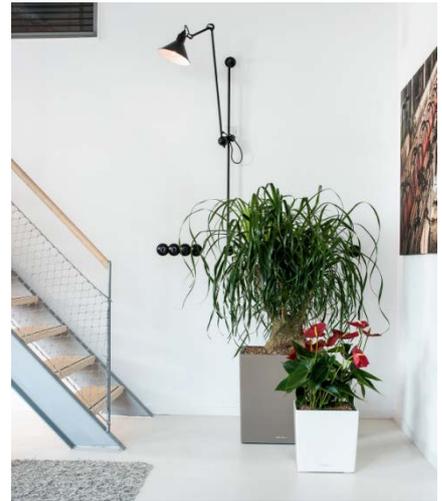

Beautiful plants are beneficial for the comfort factor at home and at work. The CUBE range is perfect for larger green plants and has a new family member from spring 2017. With a side length of 12, 16 or 20 inches and seven different colors, the LECHUZA CUBE Premium is the right choice for a harmonious interior concept. Due to its versatility and modern design, the CUBE simply radiates well-being.

At the office, plants are not only nice to look at; it is also a proven scientific fact that they lower the stress level. The green co-workers filter the air, improve air moisture and soften the noise with their dense foliage. Even the toughest office plants require the right care though. With the LECHUZA CUBE, adequate watering becomes really simple. Thanks to the well-proven sub-irrigation system with its included water reservoir, plants have access to just the right amount of water at any time. The water level indicator shows the actual water level in the reservoir to avoid overwatering.

For a green environment at the office, low-maintenance plants are the best choice. The *Spathiphyllum* requires very little light and impresses with its elegant white flowers. For those who prefer lavish greens, the *Asplenium*, the *Dieffenbachia* or the *Dracaena* are wonderful options. The largest planter of the CUBE family is ideal for higher plants, as it offers plenty of room for larger root balls.

For the living room at home, in hotels or public spaces – there is the right CUBE for any requirement. As elegant decoration on a table or sideboard or as an eye-catcher in a larger space, such as an atrium or conference room – the CUBE is ideal! To ensure blending in with the color scheme of any interior, there is a range of seven high-gloss colors to choose from. Thanks to the matching invisible coaster, the CUBE 50 can be moved around and placed flexibly and easily. The combination of the included sub-irrigation system, removable planter liners and comprehensive accessories makes caring for plants easier than ever.

The LECHUZA CUBE Premium has been available with a side length of 16 inches in the high-gloss colors white, charcoal metallic, black, shiny taupe, scarlet red, silver metallic and espresso since 2016. From January 2017, the planter is available with a side length of 12 inches. The CUBE is sold as an All-in-One Set with planter, planter liner, sub-irrigation system and the plant substrate LECHUZA-PON.

From the end of March 2017, the LECHUZA CUBE Premium is available with a side length of 20 inches. The new size also comes as an All-in-One Set with planter, planter liner, sub-irrigation system, water level indicator and the plant substrate LECHUZA-PON.

The exchangeable planter liner fits into the CUBICO or TRIO of the corresponding size.
