

# Modern Cottage style – cottage planters in graphite black

A continuing trend is the expansion of living spaces to the outside: a private outdoor area functions as a second living room or even dining room. The cottage style is particularly suitable when it comes to the design of outdoor areas. The surfaces of the planters in the cottage design look like the natural structure of woven wicker baskets and bring a little coziness to the home. At the same time, they combine the core elements of the country house style with a variety of shapes and the robustness of plastic.

The special edition of the Cottage range in graphite black brings out the color in any floral arrangement and can be combined perfectly with planters in white, granite or mocha. All cottage planters in graphite black are available as an All in One set including planter, planter liner, water level indicator and plant substrate LECHUZA-PON from January till March 2018 – while stock lasts.

The popular LECHUZA **BALCONERA** not only provides a stylish accent for the balcony and terrace, but also guarantees that gardeners can give their plants the best possible care.
