

Fun with plants – for little artists

Pretty plants – adults aren't the only ones who appreciate them. Taking care of their own plants is great fun for the little ones. They learn about how the plant grows and they enjoy the responsibility of giving the plant what it needs. The MINI DELTINI Artistic Set is fun in many ways: children can not only exhibit their talents as hobby gardeners, but show their creativity as they decorate their own planter using colorful stickers.

The MINI DELTINI set, including plant substrate and seeds, contains everything children need to be able to watch their very own plants emerge and grow. So that the little gardeners can quickly enjoy a noticeable success, the set also contains an integrated LECHUZA watering system. The water level indicator shows when the sunflower is thirsty, which makes it easy to give it regular water.

The set is a wonderful gift for little hobby gardeners. It is fun playfully interacting with nature while experiencing the gratification of how caring for the plant pays off with a beautiful blossom. Colorful stickers with original PLAYMOBIL figures make it exciting to look at the planter while they wait for the plant to grow to its full size. Children can select amongst knight and pony stickers to make their planter a unique creation.

The Artistic Set includes a MINI DELTINI in white, the LECHUZA PON plant substrate, a seed disc with sunflower seeds, and three colorful stickers with original PLAYMOBIL figures. It is available in stores starting in mid-January 2018.

MINI-DELTINI artistic set with knight theme
