

## Four themes for the new season

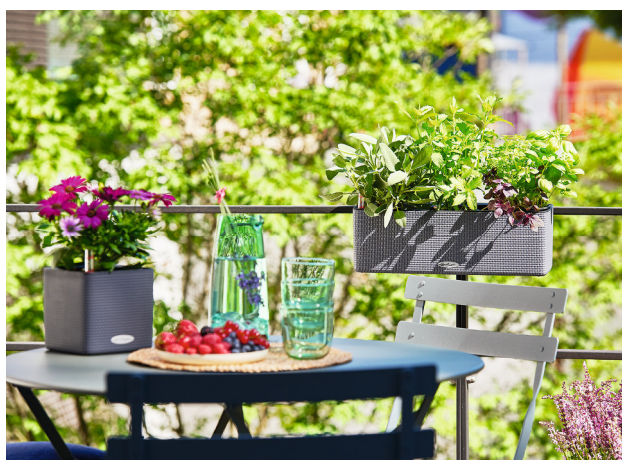

LECHUZA will be presenting four major themes and lots of new products at Stand D38/39 in Hall 10.1 at this year's spoga+gafa. By expanding its range, LECHUZA now offers a much more versatile selection of shapes, sizes and colours to suit a wide range of styles and plants. The planters combine clear, contemporary design with a sophisticated sub-irrigation system.

### MODERN LIVING // Show your own #InteriorStyle!

A key highlight is the new **YULA** product range. It is ideally suited to planting with popular houseplants and the matching stylish planters. Plant it to your requirements and use it to decorate your own four walls. The combination of planter, plant pouch and watering can will be available from mid-January 2018. Featuring the trend colours of grey and pistachio, it adds a homely, Scandinavian-inspired feel.

### PETITE GARDEN // A green oasis created with ease

With **BALCONISSIMA**, small balconies can be planted in an instant and transformed into herb gardens and green oases. The new balcony box offers space for up to three growing pots, which can be installed quickly without repotting. Thanks to the wick irrigation system, the plants remain fresh for a long time, as with the familiar CUBE 14 and 16 herb cubes. **BALCONISSIMA** will be available from mid-January 2018 in white, slate and lime green.

## ARCHITECTURAL DESIGN // Form meets functionality

**CURSIVO** offers an innovative, modern planter design: its asymmetric form gives it exciting perspectives from every angle. The extravagant planter skilfully surrounds the plants and forms an architectural highlight in every room. CURSIVO will be available from mid-February 2018 in seven high-gloss shades.

The clear bestseller of last season, **CANTO Color**, will be available in seven colours with high-quality finishes from mid-January 2018. **CANTO Premium**, a modern design element, fits into any home decor scheme and can be used flexibly as a cube or column.

## NATURAL LIVING // Inspired by nature

The trend towards naturalness in the garden and on patios remains this season – the bestseller, **CANTO Color**, will be available in a new size from mid-February 2018. **CANTO Color 40** combines the advantages of robust, low-maintenance plastic with a surface styled in a contemporary, natural stone look that looks amazingly authentic. The cubes and columns feel like coarse stone planters, yet are extremely light and can be moved around very easily.
